DETAILED ACTION

Election/Restrictions

1. Claim 52 is withdrawn (the other restricted claims were canceled) from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 11/29/10.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 56-58 are rejected under 35 U.S.C. 102(e) as being anticipated by White et al 7,201,229. White shows a production tree (figures 3-4) including: a tree body 71 including a production bore and a lateral production port 77 extending from the bore into a wing block in a first flowpath, the wing block (surrounding 81) having an upwardly facing vertical bore 113; and a utility skid 91 landable on and supportable by the tree, the skid including: a frame 91/107; a processing apparatus 109 supportable by the frame; and a conduit that is received by the upwardly facing vertical bore and allows

Art Unit: 3671

fluid communication in a second flowpath between the production bore, the processing apparatus, and the lateral production port (fig 3).

As concerns claim 57, shows a choke body 83 attached to the tree wing block and forming a the upwardly facing vertical bore, the conduit allowing fluid communication between the choke body upwardly facing vertical bore and the processing apparatus (fig 3).

As concerns claim 58, shows the conduit allows fluid to be diverted from the first flowpath to the second flowpath (fig 3).

Allowable Subject Matter

4. Claims 59-63 and 72-73 allowed.

Response to Arguments

5. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 3671

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
